PROJECTS

Seoudi Supermarket Testing Project

- Designed and executed **50+ manual test cases** covering core user workflows.
- Built an **automation testing framework** using Selenium WebDriver, TestNG, and Cucumber.
- Automated **critical regression scenarios**, reducing manual testing time by **40%**.
- Performed **API testing using Postman** to validate backend endpoints.
- Logged and tracked defects using **JIRA** in an Agile workflow.

Sprints X Microsoft Summer Camp – Graduation Project

- Designed and executed **manual test cases** to validate application functionality.
- Reported and tracked defects using **JIRA bug lifecycle**.
- Worked in **Agile team environment** simulating real industry workflow.

Smart Transport App, Software Engineering Project

- **Conducted Software Requirements Analysis (SRA)** to define functional and non-functional specifications for the platform.
- **Architected system workflows through UML Modeling**, including Use Case, Activity, Sequence, State Machine, and Class Diagrams, to visualize system behavior and structure.
- **Performed Threat Modeling** by developing **Misuse Case Diagrams** to identify potential system vulnerabilities and ensure user safety.
